Subject index

Volume 2

Acacia,
gum exudates, characteristics, Australia 329
gum, emulsification, surface activity 477
Agarose,
concentrated gels, water properties 427
Alcohol,
effect of, casein adsorption 187
Amylopectin,
reassociation, starch granules, time-dependent shrinkage 321
Astragalus,
gum exudates, chemical characterization 417
Australia,
Acacia gum exudates, characteristics 329

Batter,
viscosity, ice-cream cone baking performance 451
Biopolymer gels,
compressive de-swelling 141
Biopolymers,
food, FTIR study 169
Bovine serum albumin,
dextran sulphate, equilibrium complexes, characteristics 285
dextran sulphate, equilibrium complexes, methylene blue binding 297
dextran sulphate, non-equilibrium complexes, conditions, composition 267
BSA,
lysozyme, effect on foam composition 203

Carrageenan,
casein micelles, interactions, properties 311
effects of, cream storage stability, foaming 491
hydration, mixed electrolytes 69
starch systems, rheology 259
κ-Carrageenan,
gelation, ESR spectroscopy 19
Casein,
adsorption, effect of alcohol 187
concentrated, electrostatic interactions/ion binding 95
α_{S1} and β, competitive adsorption, emulsions 397
Casein micelles,
carrageenan, interactions, properties 311
Chicken,
egg white/ovalbumin, gelation, effects of pepsin treatment 83
Cream,
storage stability, foaming, effects of milk/carrageenan addition 491

Dextran sulphate,
bovine serum albumin, non-equilibrium complexes, conditions, composition 267
bovine serum albumin, equilibrium complexes, characteristics 285
bovine serum albumin, equilibrium complexes, methylene blue binding 297
Dietary fibre,
physiological effects 1

Egg white,
chicken, gelation, effects of pepsin treatment 83
Ethanol,
effects of, whey protein gels strength 467

Flour,
viscosity, ice-cream cone baking performance 451

Galactomannan,
food-grade, estimation, ELLA 107
lectins potential for analysis 179
Galacturonan,
ionic dispersions, measurement 151
Gliadin,
determination in food, new assay 39
Gum arabic,
γ-irradiation sterilization effects 407
protein component, role, emulsification 131
Gum tragacanth,
commercial samples, chemical characterization 51

Ice-cream cone,
baking performance, flour/batter viscosity 451
γ-Irradiation,
sterilization, effects, gum arabic 407

α-Lactalbumin,
foaming properties, characterization 225
β-Lactoglobulin,
glycosylated, foaming, emulsifying 439
glycosylated derivatives, surface viscosity, air–water interface 59
Lectins,
potential for analysis, galactomannan 179
Leucaena,
proteinaceous gums composition 247
Lysozyme,
BSA, effect on foam composition 203
foaming properties, characterization 225

Methylene blue,
binding, bovine serum albumin/dextran sulphate equilibrium complexes 297
Milk,
effects of, cream storage stability, foaming 491

Ovalbumin,
chicken, gelation, effects of pepsin treatment 83

Pectin,
aggregation, effects of pH, aqueous solution 31
amidated, characterization, enzymatic degredation 371
Pepsin,
treatment, effects of, chicken egg white/ovalbumin gelation 83
pH,
effects of, pectin aggregation, aqueous solution 31
Protein,
component, role, emulsification, gum arabic 131
concentration/purification, membraneless osmosis 195
processing, physico-chemical aspects 339
Proteinaceous gums,
composition, *Leucaena* 247

Retrogradation,
gelatinized wheat starch, gel/powder forms 381

Starch,
carrageenan systems, rheology 259
granules, time-dependent shrinkage, amylopectin reassociation 321

Thiol,
effects of, whey protein gels strength 467

Water,
properties, concentrated agarose gels 427
Wheat starch,
gelatinized, retrogradation, gel/powder forms 381
Whey,
protein gels strength, effects of thiol/ethanol 467

Xanthan,
effects of, gravitational destabilization, emulsions 119
gum dispersions, measurement 159
